

Discover Flowpresso

Flowpresso is an FDA Class II Medical Device that delivers a breakthrough approach to restorative care—combining the restorative benefits of compression and heat therapy through a non-invasive, full-body suit.

This technology works simultaneously to encourage the body to release toxins and promotes self-healing mechanisms to restore balance and enhance health.

The Benefits

- ✓ Pain Management
- ✓ Improved Movement & Mobility
- ✓ Enhanced Circulation
- ✓ Reduction of Fluid Retention & Swelling
- ✓ Improved Sleep
- ✓ Stress Reduction
- ✓ Supports Recovery & Rehabilitation
- ✓ Supports Weight Loss

Understand the Technology

Deep Pressure Therapy

Delivering pressure to the body—similar to a hug—through each chamber, allowing the body to calm and release the daily stress of life.

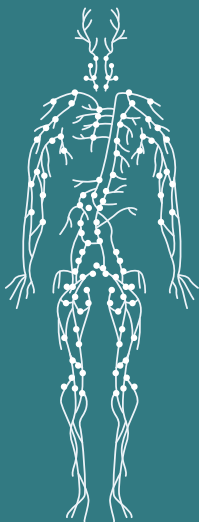

Compression

Stimulation through cyclic compression to different areas of the body. This allows the body to change how it moves, creating flow, and encouraging lymphatic drainage.

flow[®]
PRESSO

Embraces the body with a gentle, healing warmth, creating a comforting, safe environment that allows the body to finally rest and relax, releasing stored tension and restoring balance.

After a session you may experience

- A sense of calm or relaxation
- Headaches or joint pain
- More tired than usual
- A feeling similar to a hangover or detox
- Dehydration
- An increase in energy and clarity
- A deeper, longer sleep or more restless sleep
